PROJECTS

Laynie's Word Adventure | *JavaScript, React Native, Expo*   **[GitHub]**
- Developed Laynie's Word Adventure mobile application using React Native and Expo framework to create a cross-platform app for both iOS and Android.
- Designed and developed interactive game mechanics using basic JavaScript functions to engage users.
- Implemented responsive user interface with various screens and components to enhance the user experience.

OnlyPans | *JavaScript, React Native, Expo, AWS*   **[GitHub]**
- OnlyPans has been developed using React Native, a well-known open-source framework that utilizes JavaScript and React to create native mobile applications. With React Native, OnlyPans can deliver a native-like user experience while ensuring code reusability across multiple platforms, including iOS and Android.
- Utilized AWS Amplify backend for OnlyPans, enabling seamless user registration, improved scalability, and real-time data synchronization.

Rentit | *JavaScript, React, Next.js, Tailwind CSS*   **[Live] | [GitHub]**
- By employing React, a widely used and potent React framework for developing scalable, state-of-the-art web applications.
- The application employs Firebase as a backend to effectively store and administer data, such as user authentication, real-time database for property listings, and cloud storage for images.

EXPERIENCE

Green Pine Home Health | Patient Care Coordinator   San Gabriel, CA | March *2018 – Jun 2019*
- As a healthcare professional, I built relationships with patients and partners, conducted thorough reviews of patient care, and proactively addressed issues.
- Upheld patient confidentiality, coordinated medication deliveries, and facilitated communication between patients and nurses. I also ensured patients were well-informed about upcoming treatments.
